

How To Place, Thaw Or Lift a Security Freeze

ANATOMY OF A FREEZE

- When a security freeze is in place, a business that receives an application for products or services cannot get access to your credit report without your permission.
- The freeze will not affect your ability to pull your own credit report or receive credit monitoring services and businesses you currently have a relationship with can still access your report.
- To place a freeze you must contact each of the three major credit reporting agencies. When you place the freeze, you will receive a Personal Identification Number (PIN). When you want to apply for new products or services, the PIN will be required to temporarily lift (“thaw”) the freeze either for a specified creditor or a specified time. The PIN is also needed to permanently remove the freeze. Make sure to keep it in a safe place.
- It is **FREE** to place, thaw and lift the freeze for South Carolina Residents.
